

SOLIDEA ELLIPSE

SOLID, NOBLE, TIMELESS, GRACEFUL

aLEGNA

UNIQUE COMBINATION

The soft curves of the washbasin SOLIDEA ELLIPSE and the combination of wood and Corian mineral material seduce with their elegance. They give your bathroom its own elegant touch. The simple, modern design makes your washbasin a luxurious unique piece. The washbasin is not only visually convincing, but also extremely easy to clean. Particularly beautiful wood veneers are used for the outer part of the washbasin. You can decide for yourself which wood with which grain you like. The wood is lacquered and thus retains its permanently noble appearance.

The inner part of the washbasin is made of mineral material and is therefore extremely resistant, very solid and easy to clean.

BEAUTIFUL AND DURABLE

The extremely resistant washbasin made of Corian mineral material guarantees optimum protection and a very long lifespan even with intensive use. The wood veneers in the outer part are pressed together under high pressure, soaked completely with resin and then varnished so that they still look like new years later.

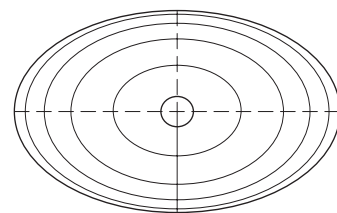

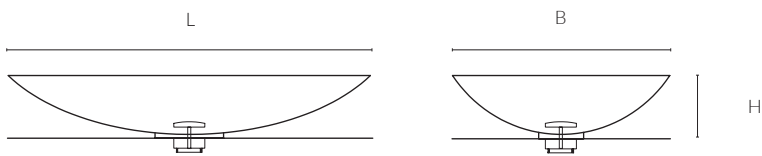

SOLIDEA ELLIPSE

SOLID, NOBLE, TIMELESS, GRACEFUL
